

1. Course Objectives

The objective of the training is to refresh and upgrade drivers skills so as to:

- Understand the concepts of defensive driving.
- Adequately prepare for driving trips.
- Anticipating potential hazards & avoid accidents
- Stay alert on the road
- Choose safe driving speeds.
- Drive safely on the Ugandan roads and traffic

2. Methodology & Training Program

The trainers use the recently (2018) revised edition of training delivery that is more suitable for the experienced driver. The new training edition is a result of invaluable feedback from the training sessions that we've run since 2001 and is based on the more interactive coaching methods by National Safety Council and Coaching Systems LLC in the United States.

The training is done in modules/topics. Our methodology and approach to *each* topic is illustrated below:

At the end of the theory training, the class is divided into small team groups and each team is given a set of situations to analyse, discuss and present to the rest of the class. **Formative assessments** is undertaken during training and **Summative assessment** at the end.

PRACTICE SESSIONS: After the theory, have **in-vehicle practice sessions**. This includes pre-trip safety checks and a commentary drive.

Upon successful completion, the candidates will be awarded a "**Certificate of attendance.**"
